REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

As to independent claim 1, "storing data regarding the received user generated event at the filed panel", in combination with the other claimed elements and features is not taught nor fairly suggested by the prior art of record.

As to independent claim 10, "transmitting by the filed panel notification of receipt of a user generated modification to the work station" in combination with the other claimed elements and features is not taught nor fairly suggested by the prior art of record.

As to independent claim 14, "field panel including an I/O device connected to communicate with at least one of a group consisting of a building control system actuator and a building control system sensor", in combination with the other claimed elements and features is not taught nor fairly suggested by the prior art of record.

As to independent claim 19, wherein the filed panel is further operable to store the data regarding the user generated field panel event in a buffer and block subsequent user generated filed panel events if the buffer is full", in combination with the other claimed elements and features is not taught nor fairly suggested by the prior art of record.

2. Prior art of record

Dudley teaches a computer that analyzes comfort levels for conditioned air. Information is entered into computer which controls the flow of air. Dudley does not disclose a field panel which in the present application is the controlling feature of the system. Dudley discloses using only a computer to control everything instead of a field panel controlling everything.
